

## **register\_login.feature**

Feature: User Registration and Login

As a new user

I want to register and log into the system

So that I can book activities and order items

Scenario: User successfully registers

Given I am on the registration page

When I submit valid details

Then I should be registered and logged in

Scenario: User logs in with valid credentials

Given I am a registered user

When I enter my correct username and password

Then I should be logged into the system

## **book\_activity.feature**

Feature: Booking Leisure Activities

As a customer

I want to book a leisure activity

So that I can enjoy experiences

Scenario: User books an available activity

Given I am logged in as a customer

When I select an available activity and confirm booking

Then the booking should be created and confirmed

## **purchase\_items.feature**

Feature: Purchasing Items

As a customer

I want to add items to my cart and place orders

So that I can purchase products

Scenario: User purchases available items

Given I have items in my shopping cart

When I proceed to checkout

Then an order should be created with order details

## **manage\_orders.feature**

Feature: Managing Orders

As a sales manager

I want to view and update orders

So that I can manage order processing

Scenario: Sales manager updates order status

Given I am logged in as a sales manager

When I change the order status to 'Shipped'

Then the order should reflect the new status

## **manage\_activities.feature**

Feature: Managing Leisure Activities

As a leisure coordinator

I want to add or update activities

So that I can keep activity listings current

Scenario: Coordinator adds a new activity

Given I am logged in as a leisure coordinator

When I submit a new activity form

Then the activity should appear in the listings

## **admin\_manage\_users.feature**

Feature: Admin User Management

As an admin

I want to create and manage users and roles

So that system access is controlled

Scenario: Admin creates a new sales manager

Given I am logged in as admin

When I create a user with the sales manager role

Then the user should have access to order management
